Professional Summary

Self-driven backend developer with 4+ years of experience designing and developing scalable web applications using Node.js, Express, and PostgreSQL/MongoDB. Specializes in secure architecture (JWT, refresh tokens, RBAC), Domain-Driven Design (DDD), and clean code principles. Built full-featured eCommerce platforms with multi-device login, token rotation, and integrated payment gateways (Stripe and Paymob). Committed to writing testable, maintainable, and production-ready code.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, SQL

- Backend: Node.js, Express.js, RESTful APIs

- Databases: PostgreSQL, MongoDB, Redis

- Security: JWT, Bcrypt, OAuth2, CORS, Helmet, Rate Limiting, Refresh Token Rotation

- Architecture: MVC, Clean Architecture, Domain-Driven Design (DDD)

- Tools: Git, Docker, VSCode, Postman, Swagger, node-cron

Key Projects

Full-Stack E-Commerce API - github.com/DeadCode-Dev/ecommerce-backend

- Full backend with Node.js, Express, PostgreSQL

- Secure JWT auth with refresh token rotation and cron cleanup

- Integrated Paymob for payments

- Role-based access (admin/user) and clean architecture (DDD)

Auth Service Module

- Modular auth system with hashed passwords and Zod validation

Inventory & Order Management

- Order creation, auto-cancellation with cron, SQL optimization

Education

Self-Taught Backend Developer

Hands-on experience + courses from Frontend Masters and Educative.io

Certifications

- Advanced Node.js - Educative

- SQL for Backend Development - DataCamp

- Web Security V2 - Frontend Masters

Languages

Arabic (Native), English (Fluent)
